Polar Bear | Species | WWF - World Wildlife Fund At the top of the food chain, polar bears have an important role in the marine environment. Learn how WWF is fighting the biggest threat to polar bears' survival: loss of sea ice. **Polar bear - Wikipedia** The range includes the territory of five nations: Denmark (), Norway (), Russia, the United States and Canada. These five nations are the signatories of the International Agreement on the Conservation of Polar Bears, which mandates cooperation on research and conservation efforts throughout the polar bear's range. Modern methods of tracking polar bear populations have been implemented only. **News & Press | WWF - World Wildlife Fund** WWF's latest press releases, media contacts, and latest reports.

Climate change | Arkive Climate change refers to man-made changes in our climate. It is often also called "global warming", as one of the most well-known effects of climate change is a steady rise in the Earth's temperature (1). Other effects include sea levels getting higher, ice melting at the poles, and extreme weather events like hurricanes and droughts becoming more common. **Arctic fox - Wikipedia** The Arctic fox (*Vulpes lagopus*), also known as the white fox, polar fox, or snow fox, is a small fox native to the Arctic regions of the Northern Hemisphere and common throughout the Arctic tundra biome. It is well adapted to living in cold environments, and is best known for its thick, warm fur that is also used as camouflage. On average, Arctic foxes only live 3-4 years in the wild. **Planet Ark Stories and Ideas** Planet Ark is all about creating positive environmental actions, for everyone " but especially for you. And the easiest way to learn about those actions is to subscribe to one or more of our e-newsletters.
